

# REGIONAL PARK FACILITIES

## Auburn House - Auburn Bay Community Centre Calgary, Alberta

The 'crowning jewel' of Carma's newest lake community, Auburn Bay, is the thirteen acre resident's association, private park site located at the community's entrance. Jason Wilson assumed the role of prime consultant and lead designer for the site development and coordinated the projects various consultant groups.

Auburn House, as the site was named, was designed to function as a full service community park. The list of unique amenities includes a pristine three acre beach front on the shores of the fully stocked recreational lake, picnic facilities, a naturalized creek course and waterfall, tennis courts, beach volleyball courts, trail and pathway systems, a fully automated interactive spray park and combined casual skating area. All enclosed in a master-planned landscape designed to emulate the Muskoka region of northern Ontario.
