

North Stoney Regional Policy Plan

Calgary, Alberta

LA West is the lone landscape architectural firm on the multi-disciplinary consultant team assigned to establish a macro-level policy document for Carma's portion of the North Stoney RPP. Lead by Brown and Associates, the project team is charged with analyzing Carma's land holdings within the region (nearly 3000 acres) and building regional and community scale plans for City / County approval and ultimately, implementation.

Literally forming the main interface with Rocky View County along Calgary's northern boundary, the North Stoney lands are understandably high in profile to a number of various stakeholders. LA West has already participated in and administered several public forums and design charrettes intended to gather valuable information for incorporation to this planning document.
