

REGIONAL PARK FACILITIES

Panorama Hills Community Centre

Calgary, Alberta

Scott Wright was the lead designer and project manager for Genstar's Panorama Hills Amenity Site and community park facility. The site was intended to function as a community core for the surrounding area.

Scott's challenge was to incorporate a wish list of recreational amenities into a functional and aesthetically appealing park space. The list of important site elements included pathway systems, picnic nodes, volleyball and basketball courts, a water spray park and a naturalized creek and waterfall feature. The surrounding landscape incorporated manicured and naturalized open spaces and a unique planting scheme.

Today, the Centre operates as a successful recreational and social hub for the Panorama Community.
