

Poetic Park Plaza

Calgary, Alberta

LA West partook in the design refinement and approvals of this small urban project. From idea generation to completion of the landscape construction drawings, LA West worked with City of Calgary Parks and its stakeholders to refine the design and take the project into construction.

This park plaza is located at one of the main gateways to the downtown core on the west end and is highly visible by all. Design detailing, site furnishings, and functional pedestrian spaces are key components to its success in providing streetscape enhancement. The addition of public art features, sustainable initiatives like silva cell units, and native planting all contribute to its character and contribution as a public space through all seasons of the year.
