

# South Gateway Commercial

Calgary, Alberta

As a design tandem, L A West and Gibbs Gage have undertaken the site design and master planning of this future south Calgary power centre. The unique topography of the site combined with a joint ownership group comprised of two prominent local land developers, have created many interesting design challenges that the team has tackled head on.

To date, the design efforts have been focused on the primary commercial spine entering the development with a heavy emphasis on enhancing the pedestrian experience.

## PROJECTS

L A West

### Type:

Commercial Development

### Client:

Genstar Development Co.  
Westcreek Developments

### Size:

65 acres

### Services:
